#### FOREWORD

This supplement to the Industrial Security Manual for Safeguarding Classified Information is issued under the authority of, and in accordance with, Department of Defense Directive 5220.22, "Department of Defense Industrial. Security Program." It establishes uniform security practices within facilities used by prime and subcontractors having custody of classified or unclassified Communications Security (COMSEC) equipment/material of the Department of Defense and certain other Executive Departments and Agencies. Users of this publication are encouraged to submit recommended changes and comments to improve the publication to the Director, Defense Investigative Semite.

In coordination with the National Security Agency (NSA), this Supplement includes detailed guidance in the areas of COMSEC accounting and control.

Included in this supplement are provisions relative to Controlled Cryptographic Items (CCI's). These provisions delineate the minimum requirements for the acquisition and ownership, transportation, physical security and access control, key accounting, reporting of insecurities and disposition of CCI materials at contractor facilities.

This revision is issued pursuant to section 1A (i) of the Department of Defense Security Agreement (DD Form 441).

HOMAS O'BRIEN

Director
